About Me

Last 4 years I make games. I developed Hyper-Casual and WebGL games. Now I focus on larger PC Steam games.

I successfully develop complex projects. I work with team to meet product goals. My skills cover Unity and Back-End systems. This helps me make multiplayer games.

I like to design good architecture solutions and gameplay mechanics. I adapt fast to new tasks and work well in teams.

Work Experience

GGCraft

Mobile games on Unity in HyperCasual genre. SDK integration, optimization, debugging, release.

OnlineDuel

Started development department from zero. First key developer in startup. Web games on Unity, server integration and communication.

404Team

Work on SpinBound - large Steam game (Balatro-like deckbuilder slot machine). Architecture design, game features implementation, profiling, optimization, refactoring.

Key Skills

- Unity, C#, Git, Game Programming
 - SOLID, OOP, ECS
 - DOTween, Zenject, DI, UniTask
 - Profiling, Memory Optimization
-

Additional Skills

- Blender, Photoshop
 - Notion, Miro, Yougile
-

Projects

SpinBound

Video: <https://youtu.be/lKWPlhaGi8o>

Roguelike deckbuilder game based on slot machine. Did all technical part. Used MVC and event architecture.

Sand Box The Game

Video: <https://youtu.be/juzhNcXmiNM>

Commercial project. Was team lead. Made mission system, building mechanics and player progression. Integrated with existing asset. Full gameplay cycle from content creation to optimization.

Brick Battles

Video: <https://youtu.be/2LQpmJtqwgI>

Fast PvP game with fully destructible brick walls. As lead programmer made combat mechanics and structure destruction physics.

Climb Race

Video: <https://youtu.be/qpqYZ4Bq6OI>

Hyper-casual racing game for speed. Made AI and user interface. Integrated Facebook SDK and AppsFlyer for analytics. Optimized for different mobile devices.

Royal Armies

Video: <https://youtu.be/7T1jF4TgQtw>

Tower defense game with strategy gameplay. Made full game implementation plus advanced close combat unit behavior.

Clean Master

Video: <https://youtu.be/hPCO2y-liII>

Casual cleaning simulator. Programmed garbage collection mechanics, timer systems and rewards. Optimized performance for mobile platforms.

Fly Delivery

Video: <https://youtu.be/L8kiIHOsKHk>

Air-logistics puzzle. Made movement and flight mechanics.

Sword Play

Video: <https://youtu.be/PeG9oAum0ZE>

Dynamic combat game with object slicing physics. Made combat combo system. Integrated Dynamic Mesh Cutter asset for realistic cutting physics. Optimized for high frame rate.

Dino Merge

Video: <https://youtu.be/HPVIqW95MAk>

Evolution puzzle with dinosaur merging. Programmed creature merge mechanics, progression system and combat arena.
